Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is in response to an amendment filed February 27, 2006. An amendment filed November 28, 2003 has been considered in the previous Office action. Claim 2 has been amended Claims 7-12 have been added,. Claims 1-12 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Bragg et al. Note the tank discussed in column 4, lines 1+. Figure 4. Note the pressure sensing means in Figure 4 includes an electronic display 84 that can be read from the outside. Different colors, for example green, etc. are disclosed in column 5, lines 50 + and column 6, lines 65+. With regard to claim 3, the pressure sensing means including switch 76 is enclosed in a detachable casing 29. Contrary to applicant's remarks, the actuation member is actually being read as element 65 including shaft 64 and disc 69. Note in column 4, lines 58+, a discussion that disc or plunger 65 "... is comprised of or carries a magnetic material that generates a magnetic field sufficient to actuate the switch 76...". This disclosure is clearly readable on the pressure sensing means being "...accommodated inside said actuation member...". The magnetic disc includes elements (carrying a magnet or being magnetic) readable on the pressure sensing means being accommodated inside the actuation member.

Allowable Subject Matter

4, Claims 8-12, drawn to the recitation that the actuation member includes a cavity and a duct "...for connection to the user device..." are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In particular see column 4, lines 16+ of Williams (pressure indicator lights).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Michael Chambers whose telephone number is 571-272-4908. The examiner can normally be reached on Mon-Thur. 6:30am-5:00pm.
